YEAR 2016-17***

Bringing out the Best
in every Student...

ISO
9001:2008
CERTIFIED
INSTITUTION

Awarded
A Grade
College
By Govt. of
Andhra Pradesh

MVR

College of Engineering & Technology

PARITALA, VIJYAWADA

The Institution has been established by the well reputed SWARNA GROUP of VIJAYAWADA under the aegis of SWARNA ACADEMY OF SCIENCES, VIJAYAWADA. The **SWARNA GROUP** has been in the existence for more than 35 years with diversified fields of business viz., Hotels, Theatres, Banking, Finance, Real estate, Granite and Education.

SWARNA ACADEMY OF SCIENCES, VIJAYAWADA (ACADEMY) was established in the year 2007 for the noble cause of imparting high quality technical education in Engineering, Technology, and Management sciences. The ACADEMY is promoted by **Sri Muthavarapu Srinivasa Babu**, a very dynamic, innovative and enterprising person, committed and dedicated to the cause of education.

SWARNA ACADEMY OF SCIENCES, VIJAYAWADA has instituted its first educational institution “MVR College of Engineering and Technology, Paritala”, in the year 2008, with the state-of-the-art facilities, such as modern computer centre, E-class rooms, round the clock internet facilities, well equipped Labs, workshops, conference cum seminar halls, spacious class rooms with OHP and LCD projectors, digital library, library with rich collection of books, national and international journals. Placement assistance cell, hygienic canteen, sports, transport facilities and city centre make MVR COLLEGE OF ENGINEERING & TECHNOLOGY, PARITALA a perfect place to study.

Academics are a continuing process of exploration, growth and sustenance. Today information explosion has brought about many changes. New ideas are generated, new interpretations are given and new applications are invented. The equations are changing very fast both in education and at the work place. Every day brings in new demands.

One has to constantly upgrade to cope with the fast emerging trends. A software professional once said “We are training people in technologies to find solutions for problems that have not yet been identified”. Moreover the roles and responsibilities of professionals are ever expanding making it imperative to move beyond the confines of the classroom and the stipulated curriculum and focus on the skills needed to cater to the needs of the society.

Hence it has become imperative to all the stakeholders in education to arm themselves with the necessary knowledge, skills and attitude to keep themselves abreast of the rapid changes. That explains everything—the Chairman’s message to the faculty to constantly update themselves with the emerging new technologies and concepts, the focus on research, paper presentations and publications, undertaking new projects, adopting new technologies for information collection and dissemination as well.

“The key to growth is the introduction of higher dimensions of consciousness into our awareness”
-- Lao Tzu.

Another milestone in MVR feather

Happy to share you that MVR college of engineering has got NAAC A grade with CGPA of 3.09. This NAAC grade will be for 5 years that is from 2016 to 2021

TIPS & TRICKS

1. Send files upto 1GB for free from Pando (<https://pando.com/>)

That's HUGE!

2. Learn how to make pretty much anything at VideoJug (<http://www.videojug.com/>)

Learn to make cool cakes or candles or dirty toys or whatever.

3. Learn to read body language and detect lies at Blifaloo (<http://www.blifaloo.com/>)

There's no sure shot way to tell if a person is lying, but you can always pretend that there is and get them to tell the truth anyway!

4. Get free tech support at Techguy (<https://forums.techguy.org/>)

If you're having problems with your computer, this free volunteer site will sort you out. Forget your stupid computer guy who only shows up when you're not at home!

5. Find free wifi spots worldwide at WifiFreeSpot (<http://www.wififreespot.com/>)
It even lists some clinics in Delhi with free Wi-Fi! Now I can just pretend to have amigraine and get free internet woohoo!

6. Send an anonymous email with 10MinuteMail (<http://10minutemail.com/10MinuteMail/index.html>)
The email address disappears after ten seconds, so you go scot-free while your nemes is finally accepts that you are the better human.

7. Learn any language in the world at Duolingo (<https://www.duolingo.com/>)
With a little patience, you can be spewing French pickup lines and Spanish cuss words interchangeably. It's very useful.

8. Watch from hundreds of documentaries at DocumentaryHeaven (<http://documentaryheaven.com/>)
It's got Kubrick on the home page, which basically convinced me that this site is legit. They've got loads of free documentaries ripe for the picking!

INTERESTED WEBSITES TO VISIT DAILY. . .

1. The Verge (www.theverge.com/)
Former Engadget EditorinChief Joshua Topolsky launched The Verge to be an accessible technology site, but one with longer, indepth features and reviews here the design is as important as the writing. Mission accomplished. The Verge may not have the most traffic among gadget blogs (yet) but it's definitely got

the buzz; it even won five Webby Awards last year. The site now also features The Verge Video, with regular video updates about the gadget world.

2. Slate (<http://www.slate.com/>)

One of the very first online magazines alongside Salon, Slate's come a long way from the days when it was owned by Microsoft. In its 17 years the online magazine has covered or argued about everything you can imagine in politics, tech, business, art, and life. It couldn't make paid subscriptions work but succeeded in podcasts, and became an award winner at the National Magazine Awards in 2011.

3. CollegeHumor (www.collegehumor.com/)

Perhaps you wish you could relive your college glory days—the good times when everything was a riot. Luckily there's plenty of that fun to be had at this comedy site, home of some of the most consistently hilarious sketches and series of today. Most of the time they are NSFW (not safe for work), so check it out before the boss gets. There was a time when only a handful of the PCMag staffers had Twitter accounts. Now Twitter is a fulltime companion for just about everyone here, and you're probably no exception. Even if you don't tweet anything yourself, it's the best place to read breaking news from media outlets, pithy comments from celebs and comics, and some solid lunch longreads. In fact, if you follow your favorite sites on Twitter you probably don't need to store them in your bookmarks bar.

4. Consumerist (consumerist.com/)

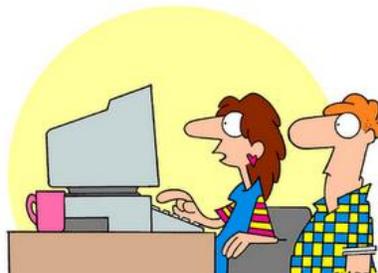

When a tech product is flawed or an online service doesn't work like it should, you'll read about it in PCMag's review. But when customer service reps refuse to listen to your cable troubles or restaurants are overcharging for their meals, you'll read about it on The Consumerist. Now owned by Consumer Reports, it's updated throughout the day and is chockfull of useful shopper information.

AMAZING FACTS ABOUT TECHNOLOGY

Indians and Bangladeshis use the internet for job hunting. Very few people in India and Bangladesh use the internet – only 20% and 11% respectively. But among those who do, job searching is a popular activity. Majorities of internet users in Bangladesh (62%) and India (55%) say they have looked for a job online in the past year, the highest rates among the 31 countries surveyed that have enough internet users to analyze.

Young Thais are internet enthusiasts. In every country we polled, younger people ages 18 to 34 are substantially more likely to say they use the internet than those who are older. Especially large differences occur in Asia, and particularly in Thailand, where 83% of 18to 34yearolds are online.

Nearly eighttinten Russians own a computer. Due to the rise of smartphones, many people in emerging and developing nations access the internet from a device other than a personal computer. But about eighttinten Americans (80%) and Russians (78%) have a working computer in their household. In contrast, only 3% in Uganda say they have a computer in their home

DO YOU KNOW THE MOST INTELLIGENT/LEARNED INDIAN EVER?

Priyanshi somani

She can be better called as the 'human calculator'. This child prodigy was the youngest participant of the Mental Calculation World Cup (2010) and won the overall title. She left everyone amazed with 100 percent accuracy in addition, multiplication and square root.

Akrit Jaswal

Considered to be the smartest person in India with an IQ of 146 performed a surgery when he was just seven years old. He successfully operated on an eight year old girl who badly burnt her finger without any formal medical training or experience. He is the youngest student to be admitted in an Indian University. The child prodigy is about to discover a cure for cancer.

Lydia sabstain

This Indian origin girl in UK beat Albert Einstein's and Stephen Hawking's IQ with a score of 162 on Mensa IQ test. She is believed to have the highest ever IQ in the world.

Koutilya Pandit

This seven year boy from Haryana left the world mesmerized with his unbelievable memory skills. He could recall 213 countries and answer general knowledge questions related to politics, economy, per capita income, geography and many more. Koutilya got an opportunity to host Amitabh Bachchan's Kaun Banega Crorepati in 2013

Lalita prasida

This 13 year old girl from Odisha won the 'Community Impact Award' at the prestigious Google Science Fair in California this year. Lalita's project was low cost water purifier which could purify waste water by passing it through different layers of corn cobs.

Ajay puri

He became the youngest web designer of the world at the age of four. Ajay Puri could operate almost all the programs by the age of two. His website, Website of Ajay Puri is a hit and he was lauded for his achievements by late Dr APJ Abdul Kalam, Bill Gates, former Prime Minister Manmohan Singh and many others. He holds the Guinness World Record of the youngest web designer.

What Are The Basic Principles of Good Networking?

1. Remember the name.

As long as the person tells you his/her name, remember it (How do I remember names during a business networking event? Is there a way to remember more than 2-3 names?). Mention their name several times during your conversation. It builds rapport fast.

2. Find commonalities.

Before you start talking about business and what the other person is doing, have a little small talk that helps you find commonalities. When you will have a strong common ground, you will leave a stronger impression.

3. Give a genuine compliment.

Compliments are the most valuable, under-utilised currency. And they are free! Make the effort to find something you genuinely like about the person you just met and tell him/her. Sense of fashion, great question they asked, interesting observation they made. Before you start making business, it helps to develop a good personal connection.

4. Give value first.

Most people make a mistake of thinking it's o.k. to ask others for a favour without not giving anything. The most important rule of networking is to GIVE VALUE FIRST without expecting anything in return. That's just good karma. We never know who from the people we have met at a networking event turns out to be a great and valuable connection. But leaving a great impression by helping others usually comes back to us via recommendations. Or by being on top of mind in case others hear about an opportunity that we should know about.

5. Always follow through.

People go to networking events, but most connections never develop into a business relationship due to lack of follow up. The most successful startup owners and entrepreneurs made it, because they had a system in place of following up.

Events @ MVR 2016

International women's day celebrations

Chief Guest: Gottipati Satyavani

CONGRATULATING Md Sulthana for her Gold Medal

From Krishna University

ముత్తవరపు కళాశాల అధ్యాపకురాలికి బంగారు పతకం

కంచీకచర్ల, న్యూస్ టుడే: పరిటాల ముత్తవరపు ఇంజనీరింగ్ కళాశాలలో ఆసోసి యేట్ ప్రొఫెసర్ మహమ్మద్ ఆస్పిరిన్ సుల్తానా బంగారు పతకం సాధించినట్లు చైర్మన్ ముత్తవరపు శ్రీనివాసబాబు తెలిపారు. కృష్ణా విశ్వ విద్యాలయం నిర్వహించిన ఎమ్ ఎ (ఆగ్లం)లో అత్యధిక మార్కులు సాధించడంతో ఆమెకు పతకం వచ్చిందని చెప్పారు.
